

# MPI Implementation Health Assessment Through Multi-Institutional Distributed Testing

Joshua Hursey  
jjhursey@osl.iu.edu

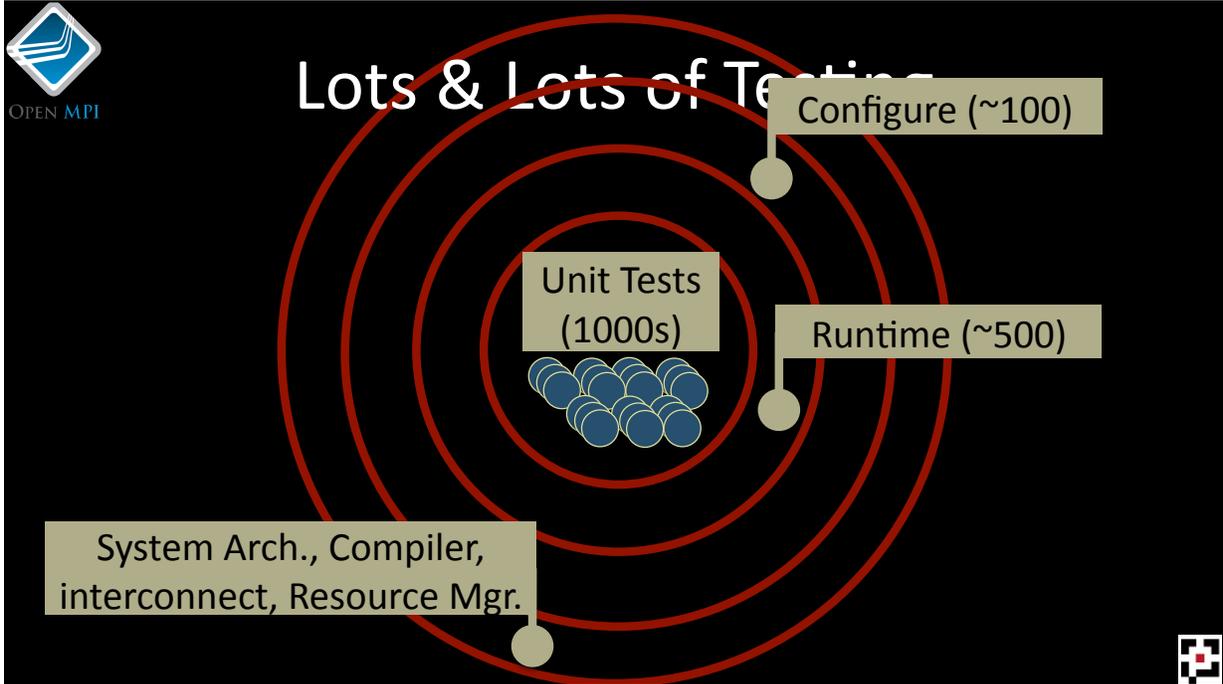

## Open MPI

Combine the expertise from across the HPC community to create the highest-quality, open-source MPI implementation capable of efficiently supporting desktop to petaflop systems.

How well are we meeting our goals?

How can we assess the health of the project?

**Coverage: The Old Method**

Compiler	Launchers	Other	Testing	Interconnects
gcc 4 #BS, VTK UH	rsh/ssh	Other = DOT ok sm coll ? NO hierarch coll ? tuned coll ? POE ? BLACS Test suite?	Platforms Intel 64 Intel 32 AMD 64	Interconnects Sm TCP mVapi Open JIB om MAX
intel 40 #BS 8.1 #BS 8.0 #BS	TN Slurm Xgrid Foe	Rainer + G.Fong T. Witzball	Intel 64 Intel 32 AMD 64	case 20 case 20 #BS 20 OR 20
portland 5.2 IU 6.0 IU	Yes Bproc	Intel 64 open JB, sm AMD 64, PowerPC 64	case 20 case 20 case 20	
pathscale 1.0 #BS IU	MPI-2 dynamic cross	Linux PPC on mp, Link PC 32 Linux AMD on mp, Intel 32	case 20 case 20 case 20	
successful completion check status run hello, ring		+ Jeff + Jim Intel 32, 64 TCP, sm, mpi, gm	Spart 32 Spart 64	

# The MPI Testing Tool (MTT)

Infrastructure for automated, distributed testing

- Institutions volunteer testing resources
- Combine all testing results into a database
- Provide tools for testing analysis
